

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

IN THE CLAIMS.

1. (Currently Amended) A data management method, comprising:
providing a data engine;
obtaining ~~an~~ a first observation automatically recorded by a data sampling at an output device,
and a second observation manually recorded by a user, said first and said second
observations defining a plurality of different observations, said plurality of different
observations relating to data of an identical subject;
~~obtaining another observation at another output device, wherein said observation and said~~
~~another observation define a plurality of different observations from a plurality of different~~
~~output devices;~~
sending said plurality of different observations ~~from said plurality of different output devices~~
to said data engine;
storing said plurality of different observations in a database under control of said data engine;
and
in response to a report request:
retrieving said plurality of different observations from said database in accordance with
parameters in said report request to provide a plurality of retrieved observations; and
producing a report based on said plurality of retrieved observations.
2. (Currently Amended) A clinical trial data management server method, comprising:
receiving, at a server, a user profile provided by a client;
based on said user profile, indicating to said client one or more matching clinical trials;
receiving a clinical trial selection from said client;

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

providing to said client a selected clinical trial module, indicated by said clinical trial selection and corresponding to a selected one of said matching clinical trials, said module being adapted to obtain clinical trial data including a respective data observation;
receiving, at said server, said respective data observation;
storing said respective data observation in a database of data observations; and
in response to a report request:
retrieving selected ones of said data observations from said database in accordance with
parameters in said report request to provide a plurality of retrieved observations; and
producing a report based on said plurality of retrieved observations.

3. (Canceled).

4. (Currently Amended) The clinical trial data management server method as set forth in claim [[3]] 2, wherein said clinical trial data is provided to said server by a data sampling medical device.

5. (Currently Amended) The clinical trial data management server method as set forth in claim [[3]] 2, wherein said clinical trial data is provided to said server over the Internet.

6. (Currently Amended) The clinical trial data management server method as set forth in claim [[3]] 2, wherein said clinical trial data is provided to said server by a general-purpose computing device having said clinical trial data manually inputted by a user.

7. (Original) The clinical trial data management server method as set forth in claim 6, wherein said general-purpose computing device is one of: a personal computer, a handheld computing device, and a telephone.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

8. (Currently Amended) The clinical trial data management server method as set forth in claim [[3]] 2, wherein:

said server includes a data engine;

said ~~server data engine~~ comprises a plurality of modules, including said selected clinical trial module, a health data management module, and a clinical trials management module;

said health data management module comprises data analysis algorithms used by said data engine to analyze said clinical trial data; and

said clinical trials management module:

selects said one or more matching clinical trials, based on said user profile;

provides an approval of said clinical trial selection; and

provides said selected clinical trial module.

9. (Original) The clinical trial data management server method as set forth in claim 8, wherein said clinical trials management module performs said selecting of said one or more matching clinical trials by comparing said received user profile with clinical trials profiles stored in a clinical trials database.

10. (Original) The clinical trial data management server method as set forth in claim 8, wherein said health data management module comprises data analysis algorithms and is adapted to accept data for one or more of: cardiology data, diabetes data, allergy data, and immunology data.

11. (Original) The clinical trial data management server method as set forth in claim 8, wherein said health data management module is adapted to send analyzed data to said client, said analyzed data comprising one or more of: a data display, complex data charting, and trend identification.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

12. (Original) The clinical trial data management server method as set forth in claim 11, wherein said complex data charting comprises mathematical EKG pattern analysis.

13. (Original) The clinical trial data management server method as set forth in claim 11, wherein said trend identification is based on a plurality of said data observations from a plurality of different medical devices.

14. (Currently Amended) A clinical trial data server, comprising;
a data engine receiving a user profile provided by a client;
~~said data engine having~~ a clinical trials management module for analyzing said user profile and
indicating to said client one or more matching clinical trials;
one or more clinical trial modules adapted to obtain clinical trial data, including respective data observations;
~~said data engine receiving a clinical trial selection from said client;~~
said clinical trials management module providing to said client a selected one of said one or more clinical trial modules ~~module~~, indicated by a ~~said~~ clinical trial selection, and corresponding to a selected one of said matching clinical trials.

15. (Currently Amended) The clinical trial data server as set forth in claim 14, further comprising a health data management module receiving said respective data observations ~~clinical trial data relating to one of said clinical trials, said clinical trial data including a respective data observation~~; and said data engine storing said respective data observations ~~observation~~ in a database of data observations.

16. (Currently Amended) The clinical trial data server as set forth in claim 15, wherein said data engine is adapted to receive said clinical trial data from a data sampling ~~medical~~ device.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

17. (Currently Amended) The clinical trial data server as set forth in claim 15, wherein said respective data observations are received ~~data engine is adapted to receive said clinical trial data~~ over the Internet.

18. (Currently Amended) The clinical trial data server as set forth in claim 15, wherein said respective data observations are received ~~data engine is adapted to receive said clinical trial data~~ from a general-purpose computing device.

19. (Original) The clinical trial data server as set forth in claim 18, wherein said general-purpose computing device is one of: a personal computer, a handheld computing device, and a telephone.

20. (Original) The clinical trial data server as set forth in claim 15, wherein:
said health data management module comprises data analysis algorithms used by said data engine to analyze said clinical trial data; and
said clinical trials management module:
selects said one or more matching clinical trials, based on said user profile;
provides an approval of said clinical trial selection; and
provides said selected clinical trial module.

21. (Original) The clinical trial data server as set forth in claim 20, wherein said clinical trials management module performs said selecting of said one or more matching clinical trials by comparing said received user profile with clinical trials profiles stored in a clinical trials database.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

22. (Original) The clinical trial data server as set forth in claim 20, wherein said health data management module comprises data analysis algorithms and is adapted to accept data for one or more of: cardiology data, diabetes data, allergy data, and immunology data.

23. (Original) The clinical trial data server as set forth in claim 20, wherein said health data management module is adapted to send analyzed data to said client, said analyzed data comprising one or more of: a data display, complex data charting, and trend identification.

24. (Original) The clinical trial data server as set forth in claim 23, wherein said complex data charting comprises mathematical EKG pattern analysis.

25. (Currently Amended) The clinical trial data server as set forth in claim 23, wherein said trend identification is based on a plurality of said data observations from a plurality of different data sampling medical devices.

26. (Currently Amended) A clinical trial client for use on a computer, comprising:
a module for sending a user profile to a clinical trial data server;
a module for receiving from said clinical trial data server an indication of one or more matching clinical trials;
a module for accepting a user selection of one of said one or more matching clinical trials, and sending to said clinical trial data server a clinical trial selection; and
a module for receiving and installing a selected clinical trial module corresponding to said clinical trial selection, the selected clinical trial module being adapted to obtain clinical trial data, including a respective data observation, from a clinical trial subject.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

27. (Currently Amended) The clinical trial client as set forth in claim 26, further comprising a module for sending said clinical trial data, ~~relating to said clinical trial selection,~~ to said clinical trial data server.

28-34. (Canceled).

35. (New) A method of providing a data management server, comprising:
providing a data engine for controlling storage of a plurality of different observations in a database;
providing a plurality of modules adapted to communicate said plurality of different observations to said data engine;
selecting from said plurality of modules those necessary to handle processing at the server for:
clients that provide an observation, relating to a given subject, to the server via a web browser, and
clients that provide an observation, relating to the given subject, to the server from a data sampling device;
providing a reporting module adapted to interact with said data engine to generate a report based on selected ones of the plurality of different observations; and
combining said data engine, said selected ones of said plurality of modules, and said reporting module to provide said data management server.

36. (New) The method of providing a data management server as set forth in claim 35, wherein the selected ones of the plurality of modules include a module adapted to handle processing at the server for clients that provide an observation, relating to the given subject, from a remote data source comprising a database.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. APPLICATION NO. 09/921,595
Attorney Docket No. A7949

37. (New) The data management method as set forth in claim 1, further comprising providing a plurality of modules for interacting with said data engine, including a first module obtaining the first observation from the data sampling device and a second module obtaining the second observation from the user.

38. (New) The data management method as set forth in claim 37, wherein the second module interacts with a data input device other than the data sampling device.

39. (New) The data management method as set forth in claim 1, further comprising obtaining from a remote data source a third observation relating to said subject, the remote data source being a remote database.
